Allowable Subject Matter

Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest "said cam ring and said support ring each have respective guide surfaces engageable with each other when the cam follower is moved in the region of said open end and shaped to guide the cam follower at said open end of the cam groove during engagement" in combination with the remaining claim elements as set forth in claims 1-9.

The prior art does not disclose or suggest "said cam ring and said linearly movable ring comprise a first leading portion and a second leading portion which are engageable with each other to press said linearly movable ring in said axis direction to guide said cam follower to said imaging control section from said standby section by a rotation of said cam ring, when said cam follower is in said standby section" in combination with the remaining claim elements as set forth in claims 10-14.

The prior art does not disclose or suggest "said cam ring and said linearly movable ring comprise a first leading portion and a second leading portion which are engageable with each other to press said linearly movable ring in said axis direction to guide said cam follower into said open end of said cam groove by a rotation of said cam ring, when said cam follower is disengaged from said cam groove through said open end" in combination with the remaining claim elements as set forth in claims 15-19.
